Claims 1-5 are pending in this application.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Cosby.

Applicant's remarks relative hereto, filed on 3/28/97, have been given due consideration, but were found unpersuasive. The essential basis for applicants' traversal is that the prior art by Cosby is directed to pesticidal utility, whereas applicant's invention is directed to microbicidal utility and human skin treatment utility. However, applicant is in error, for the claimed invention is directed to a

composition and method of making said composition, not to a method of providing treatment. Therefore, Cosby's utility is not pertinent to the issue of obviousness of a suggested composition and process of making.

For these reasons, all claims are rejected again.
